# Team Mahogany Weekly Status Report
*Week of 2/19/18*(1)

Team
- Elyse Cooper, Kevin Dorosh, Ryan Stocking, Richard Preston

This Week
- Met to make the updated storyboard for this semester
- Discussed future steps on implementation of the SD card memory addition
- Received the SD card on which to write files
- This week was slow due to Elyse being gone and the chaos of e-week
- Kevin's software progress has been slowed due to a directed study deadline in early March
  - Also needs a better idea of how complete/frequent our data transmissions will be

Next Week
- Working on establishing the SD card as a slave of the Arduino
- Working to clean up the existing code
- Kevin needs to complete machine learning directed study to free up time for capstone again
- Team meeting
  - Need to hash out data expectations once the SD card has been used for testing

# Team Mahogany Weekly Status Report
*Week of 2/19/18* (2)

Long Term
- Developing a test scenario list for our project sponsor under which a new or modified version of the system might be needed

Critical Obstacles
- The hardware that we currently have may make some of the transmission aspects of the project difficult
- Software accommodations for intermittent/incomplete transmissions aren't simple
- Software written may need to be rewritten as we re-scope the project

Risks/Contingencies
- We are at a risk of slowing down given a re-scope of our project
